Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor shows a method of manufacturing a fluid dynamic bearing including the structure of a sleeve attached to a base member and having a sleeve surrounding the shaft and rotatably supported thereto, the base member having a cylindrical wall which surrounds the rotatably supported sleeve member, and an annular cover member having an inner peripheral edge smaller in diameter than an inner peripheral surface of the cylindrical wall, wherein oil fills part of a radial gap between the shaft and the sleeve, and wherein the method of making the fluid dynamic bearing includes the steps of holding the oil in part of the radial gap and then laser welding the annular cover member to the cylindrical wall at a point axially separated from the oil.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
